

Create a map of your outdoor space. Include features you think are important, and make sure to include where you are!

## Backyard Field Guide

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Outside place: \_\_\_\_\_

Try to find bugs living in your outdoor space. Each time you find one, sketch or describe it. You might need to peek under leaves, lift rocks or potted plants, dig a little, etc. Remember to be gentle!

What kinds of different plants are in your outdoor area? Find at least two different kinds of plants, and sketch them. Describe them if you like. What is different about them? Can you find any things they have in common?
