

PUL Mask Requirements

PUL

Cut (1) 7 ½" x 8"

Fabric

Cut (1) 7 ½" x 8"

Cut (2) 1 ¾" x 5 ½"

Elastic - ¼" wide or less

Masks need to be fitted so I've discovered it is better to cut longer elastic strips. For instance my husband needed his cut 10 ¼" long. I only needed 9 ½". The elastic is knotted and can be adjusted to a smaller size by undoing it and re-knotting.)

Cut (2) 9 ½ (+ -)" lengths

Pleating instructions

Sewers are finding that because of the thickness of the first two seams and because the PUL does not press as flat as fabric, their mask before pleating measures 7" x 7 ½" instead of 7 ½" x 7 ½".

So I have revised my pleating directions below.
