CAMPUS CORONAVIRUS SAFEGUARDS
Reminders for Rice Visitors, Students and Employees

In keeping with the recommendations of the Centers for Disease Control and Houston and Harris County public health officials, the following Rice campus coronavirus safeguards will remain in place until further notice:

1. With the exception of the Rice University Police Department, all campus buildings are closed to campus visitors. For the few Rice employees and students who remain on campus, entrance to Rice buildings is permitted via restricted Rice ID card access only.

2. When walking on campus, Rice visitors, students and employees should follow the same safety rules that local elected officials have established for public parks and sidewalks:
   a. Maintain six feet of social distance between yourself and others who do not live with you, and for your safety, and to avoid traffic congestion, please avoid walking on campus roadways.
   b. Do not use public benches, picnic tables or other high-contact fixtures to avoid viral spread.
   c. All recreation fields are closed until further notice; in addition, we ask that visitors respect the privacy of campus residences (buildings that include the words college, house or apartments in their names) by avoiding these areas. A campus map is reproduced on the back of this flyer, and signs are posted on campus to indicate areas which are open only to campus residents.

3. For those who visit the campus with family pets, we remind you that the university is obliged to enforce the following city of Houston pet ordinances and related campus regulations:
   a. When not behind a fence or wall that prevents “running at large,” pets must be kept on leashes under the direct, physical control of their owners at all times.
   b. When walking pets on property other than their own, pet owners must arrange to pick up and sanitarily dispose of pet waste. (On the Rice campus, the brown, outdoor waste receptacles may be used for the deposit of bagged pet droppings.)
   c. Pets are not permitted on campus recreation fields at any time.

Thank you for helping us keep our entire community safe by respecting these important health guidelines.
