INDUSTRY-SPECIFIC SAFER-AT-HOME FEEDBACK AND EDUCATION WEBINARS

Boulder County Public Health and your Boulder County chamber and economic development partners invite you to a listening and feedback session specific to your industry. The goal of the session is to get input so that Boulder County Public Health can prepare clear guidance that will increase compliance and minimize confusion before transitioning to the Safer-at-Home order as early as May 9.

We also invite you to an education session about how the Safer-at-Home order affects your industry. The purpose of the session is to minimize confusion in advance of transitioning to the Safer-at-Home order and help you prepare for the requirements.
