Rauschenberg Monoprints

Materials

- Glue
- Cardstock
- Collage materials (magazines)
- Scissors
- Wax paper
- Paint (red, blue, and yellow acrylic)
- Paintbrush
- Water cup (for paintbrush)

Instructions

1. Cut interesting images and shapes out of magazines and other recycled papers. Glue these clippings to the cardstock to create a collage. Set the collage aside.

2. Squirt or pour paint (about the size of a quarter) onto the sheet of wax paper and use the paintbrush to create brushstrokes of paint across the surface.

3. Place the wax paper face down onto your collage and rub the back of the wax paper to transfer the paint onto the collage.

4. Pull away the wax paper to reveal your monoprint!

**TIP:** If you still have paint on your wax paper, place the wax paper onto a different spot of your collage and repeat steps 3 and 4.
