Instructions: Paper Plate Suncatchers

Step 1: Collect your materials: iron, fresh flowers (the moisture helps them stick to the wax paper), a pencil, paper plate, scissors, and tape.

Step 2: Cut out the center of your paper plate for the border of your suncatcher. This is also a good opportunity to use any old themed paper plates you might have at home. If you don't have any paper plates, construction paper or white paper will work!

Step 3: Using the center you just cut out, trace two circles onto your wax paper with a pencil. (Discard the center of the plate once you have traced the forms)

Step 4: Loosely, cut out the two circles drawn on your wax paper. This will be the center of your suncatcher.

Step 5: Arrange your fresh flowers on top of one wax paper circle.

Step 6: Place the second wax paper circle on top of the flowers.

Step 7: Tape along the edges of the wax paper to secure the wax paper.

Step 8: Using an iron, gently press the flowers between the two sheets of wax paper, until the wax paper sticks together.

Step 9: Decorate your paper plate border with markers, washi tape, stickers or anything decorative.

Step 10: Tape the wax paper onto the backside of the plate.

Step 11: Display your suncatcher on your window. Using tape, adhere your work of art onto your ideal window! Optional: Tape string onto the back of your plate to hang by the window.

For safety precautions, please place a piece of paper or cloth over the wax paper before ironing.
