

DLN

Useful Tools and Programs for Working Remotely

LogMeIn

logmein.com

Allows users to remotely connect to their remains desktop from another machine anywhere on the internet

RDP

Remote Desktop provides a simpler, more native feeling experience than LogMeIn of accessing desktops. Requires access through the VPN

VPN access

Your remote employees can log on to your office network from anywhere — home, traveling, in transit — that has access to the internet. They then have access to all your company resources, and somehow your data is still secure.

Zoom

zoom.us

Zoom is a screensharing/video conferencing tool currently in use for weekly custom meeting.

ScreenConnect

ScreenConnect is a simple remote helpdesk tool where a link can be emailed to a user on any machine inside or outside the network and a remote helpdesk session will be immediately initiated.

Slack

slack.com

Slack is a lightweight collaborative messaging/chat platform that has been very popular in professional use for several years. We will send out a poll to users to see who is experienced with it and if it would be helpful for their department. Many businesses have found it a game changer.
